

XS Power D1600 Battery

Brand: XS Power Batteries
Product Code: D1600
Availability: 5
Weight: 50.00lb
Dimensions: 10.24in x 6.75in x 7.20in

Price: \$329.99

Short Description

Battery, 16 V, AGM, 675 Cranking Amps, Top Terminal, 10.24 in. Length, 6.4 in. Width, 7.2 in. Height, Each

Description

Battery Usage: Starting

Volts: 16 V

Battery Terminals: Top

Battery Type: AGM

Cranking Amps at 32 Degrees F: 675 amps

Reserve Capacity: 84 minutes

Length (in): 10.240 in.

Width (in): 6.750 in.

Height (in): 7.200 in.

Weight: 46.000 lbs.

Quantity: Sold individually.

Notes: Reinforced case designed for high vibration applications. 6mm threaded terminals. Includes 6mm to 3/8 terminal adapters. . Powermaster recommends charging the battery upon receipt.

These XS Power AGM batteries are some of the lightest 12, 14, and 16 V racing batteries on the market. Independent test results have proven that they outperform other batteries weighing 10-20 lbs. more. Their cutting-edge lead acid battery technology produces more energy in a smaller space because each cell is compressed before insertion into the case. This creates efficient power-producing packages that are completely sealed with no need to ever add water. This, combined with being an inch shorter than the competitors, means that these batteries will fit in places where space is a premium. By design, the entire line of XS Power AGM batteries has excellent deep-cycling ability and ultra-low internal resistance, resulting in high cranking amps and excellent vibration resistance. These batteries are non-spillable and can be mounted in any position (except upside-down). The XS Power AGM batteries are designed for the abuse of racing and they are the batteries of choice for demanding racers and Monster Truck drivers who need top performance and reliability.
